

Wireless Local Area Network Configuration Guide For Android Device (eduroam)

**College of Professional and Continuing Education
The Hong Kong Polytechnic University**

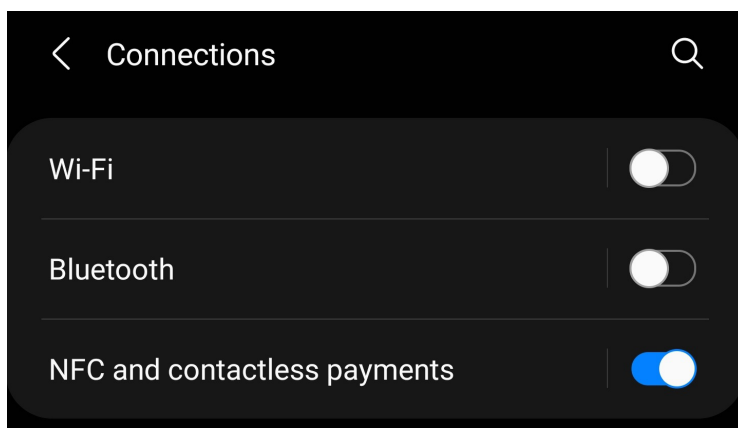

Version 1.3

IT Service Counter	Location	Tel no.
WK Campus	Room S203/S204	3746-0819

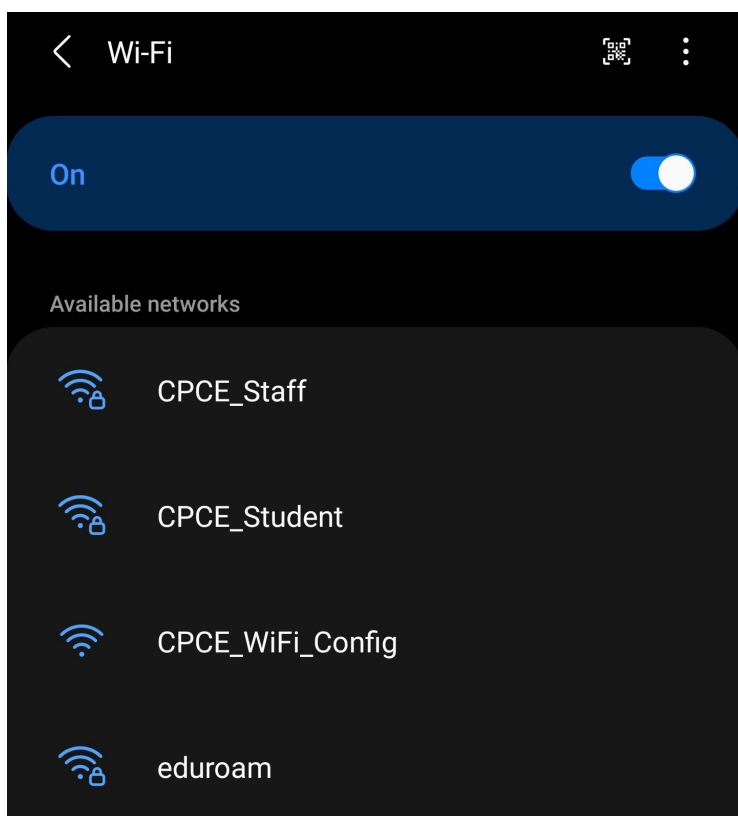

Email: itu.helpdesk@cpce-polyu.edu.hk

Note: This guide provides general instructions for setting up Android device to connect to campus Wi-Fi services. Based on varying device manufacturers and Android versions, user may encounter different configuration steps from the guide.

1. Go to “**Settings**” and select “**Wi-Fi**” under “**Connections**” or “**Network & Internet**”, depending on device manufacturer or OS version

2. Change Wi-Fi option to “**On**” and select “**eduroam**”

3. Configure network properties as follows and then select “**Connect**”

- EAP method: **PEAP**
- Phase 2 authentication: **MSCHAPV2**
- CA certificate: **Use system certificates**
- Online certificate status: **Don't validate**
- Domain: **wifi.cpce-polyu.edu.hk**
- Identity: Your **userID** plus **@cpce.hk** (i.e. **userID@cpce.hk**)
- Password: Your **portal password**

The screenshot shows the 'eduroam' configuration screen. At the top, there is a back arrow and the text 'eduroam'. Below this, the 'EAP method' is set to 'PEAP'. The 'Identity' field is empty. The 'Password' field is labeled 'Enter password' and has a toggle icon. The 'CA certificate' is set to 'Use system certificates'. The 'Online certificate status' is set to 'Don't validate'. The 'Domain' is set to 'wifi.cpce-polyu.edu.hk'. The 'Auto reconnect' toggle is turned on. There is an 'Advanced' section with an upward arrow. Below this, the 'Phase 2 authentication' is set to 'MSCHAPV2'. The 'Anonymous identity' field is empty.

4. A “**Connected**” status will be shown if your device is successfully joined to the Wi-Fi
